

YAFET PURNAMA

Full Stack Developer | IT Analyst

Aspiring Software Engineer with a strong foundation in modern web development and database management. Experienced in building scalable applications using Next.js 15, React 19, and Golang, with hands-on expertise in real-time system architecture and database optimization. Proven track record of delivering end-to-end technical solutions in corporate and organizational settings. Eager to leverage analytical skills and technical proficiency to contribute to high-impact projects in the fintech industry.

Surabaya, Indonesia | 082124952938 | joshuapurnama123@gmail.com | [linkedin.com/in/](https://www.linkedin.com/in/) | [Portfolio](#)

TECHNICAL SKILLS

- **Languages:** Dart (Advanced), JavaScript (ES6+), TypeScript, PHP, Python, Go (Golang), C#, SQL.
- **Frameworks & Libraries:** Next.js 15, React 19, Node.js, Laravel, Tailwind CSS v4, Drizzle ORM.
- **Mobile Development:** Flutter SDK (ver 3.x), Provider (State Management), MVVM Architecture.
- **Backend & Database:** Supabase (PostgreSQL, Row Level Security/RLS), Firebase (Auth, Cloud Messaging), SQLite (Offline Caching), Server SQL (MariaDB/ MySQL)
- **Core Competencies:** RESTful API Development, System Analysis, Database Optimization, Agile/Scrum, Debugging & Troubleshooting.
- **Domain Knowledge (Fintech):** Accounting Algorithms (Asset Depreciation, Penalty Calculation), Real-time Database, REST API Integration.
- **Tools:** Git, Postman, Android Studio, VS Code.

PROJECT EXPERIENCE

Kelola Kosku (Capstone Project)

Full Stack Mobile Engineer | (*Jan 2026 – Present*)

An advanced accounting information system for property management, built with Flutter and Supabase.

- **Fintech & Accounting Logic:** Engineered automated financial algorithms, including Straight-Line Depreciation for assets and Daily Penalty Calculation for overdue invoices, directly mirroring core fintech functionalities.
- **Secure Backend Architecture:** Designed a scalable PostgreSQL database on Supabase implementing Row Level Security (RLS) to strictly isolate data between Owners, Admins, and Tenants (Multi-tenancy).
- **Real-time Financial Reporting:** Developed features to generate real-time Income Statements and Cash Flow Reports, helping owners visualize Net Profit and operational costs instantly.
- **Complex Feature Implementation:** Integrated Firebase Auth for secure Google Sign-In, Local Notifications for payment reminders, and Offline Caching (SQLite) for data accessibility without internet.
- **Cross-Platform Deployment:** Successfully optimized the application for Android and iOS, handling platform-specific permissions and file management (Image Picker & Storage).

PROFESSIONAL EXPERIENCE

GMS Church – Surabaya, Indonesia

Full Stack Developer Intern (*Apr 2025 – Jul 2025*)

- Engineered a centralized inventory management system from scratch, owning the full Software Development Lifecycle (SDLC) from stakeholder requirements analysis, system architecture design, to production deployment.
- Developed a high-performance backend using Next.js 15 API Routes, enabling reliable RESTful API services and efficient data flow between frontend and database layers.
- Implemented real-time communication using WebSockets to synchronize locker status updates, significantly reducing data latency and improving operational visibility for administrators.
- Architected a secure authentication and authorization system using Next-Auth with OAuth integration, implementing Role-Based Access Control (RBAC) to manage access for admins and volunteers.
- Built a responsive admin dashboard using React 19 and Tailwind CSS v4, delivering an intuitive UI that streamlined asset management workflows for 100+ active volunteers.
- Developed an encryption-based QR code system to automate asset borrowing and return processes, improving traceability and reducing manual administrative tasks.

SUTINDO GROUP – Surabaya, Indonesia

IT Analyst & Database Administrator *(Dec 2022 – Jun 2024)*

- Optimized SQL queries and database performance for the ERP MRP (Material Requirements Planning) module, improving report generation speed by 20%.
- **Maintained and managed master data integrity** across multi-branch operational systems, ensuring accurate synchronization between central and branch databases.
- **Diagnosed and resolved critical bugs** in the internal web-based ERP system, reducing operational disruptions for the purchasing department.
- **Collaborated with cross-functional teams** to design and implement **Standard Operating Procedures (SOP)** for IT data management and system operations.
- **Provided Level 2 technical support** for hardware, software, and network issues, supporting business operations across **3 branch offices**.

(Previously held roles in IT Support and Logistics Administration, demonstrating adaptability in technical operations and business process management.)

FREELANCE – Surabaya, Indonesia

IT Developer *(Jan 2023 – Present)*

- Developed a custom "Semi-ERP" Cashier Program for a retail client, streamlining transaction recording and inventory tracking.
- Maintained and updated existing web applications, performing regular debugging and feature enhancements based on client feedback.
- Built custom company profile websites focusing on SEO optimization and responsive design principles.

FREELANCE – Surabaya, Indonesia

Website Developer *(June 2022 – August 2022)*

- Assist the client to create a design according to the client's wants and needs.
- Analyzing client's request and requirements.
- Creating wireframes to provide clients with a visual overview.
- Developing a customized page-to-page company profile website for clients in the branding and advertising services industry.
- Ensuring website responsiveness and maintaining a professional appearance.

Xavior Event Organizer – Surabaya, Indonesia

Project Coordinator *(Oct 2018 – Dec 2019)*

- Coordinated with **multiple vendors, clients, and internal teams** to ensure seamless execution of large-scale wedding events.
- Developed **detailed event timelines, technical run-downs, and operational checklists**, ensuring all event protocols were executed without critical issues.
- Facilitated **stakeholder meetings with clients and vendors** to align event requirements, logistics, and execution plans.
- Managed **on-site event operations**, ensuring smooth coordination between vendors, technical teams, and organizers during live event execution.

EDUCATION

UNIVERSITAS WIDYA KARTIKA – Surabaya, Indonesia

Bachelor of Informatics Engineering *(August 2023 - Present)*

- Current GPA: Present / 4.00 (Expected Graduation: 2026)
- Relevant Coursework: Web Programming, Database Systems, Algorithm & Data Structures, Cyber Security.

UNIVERSITAS CIPUTRA – Surabaya, Indonesia

Information Systems for Business *(Sep 2020 – Dec 2022)*

- GPA: 3.57 / 4.00

ORGANIZATIONAL EXPERIENCE

COMMITTEE MAJOR CIPUTRA SURABAYA – Surabaya, Indonesia

Chairman of Perception and Reasoning Development Department (2020 - 2021)

- Event Staff – MonsoonSIM EPIC Competition 2020
- Inventory Specialist – MonsoonSIM EPIC Competition 2021
